IO-Link Data Map

This document refers to the following IODD file: Banner_Engineering-Q5X-Analog-20210518-IODD1.1.xml. The IODD file and support files can be found on www.bannerengineering.com, under the download section of the product family page.

Communication Parameters

The following communication parameters are used.

Parameter	Value	Parameter	Value
IO-Link revision	V1.1	Port class	A
Process Data In length	32 bits	SIO mode	Yes
Process Data Out length	8 bits	Smart sensor profile	Yes
Bit Rate	38400 bps	Block parameterization	Yes
Minimum cycle time	3.6 ms	Data Storage	Yes
Device ID	589828	ISDU Supported	Yes

IO-Link Process Data In (Device to Master)

Process Data In is transmitted cyclically to the IO-Link master from the IO-Link device.

The Q5X Analog IO-Link Process Data is 32-bits and includes two types of measurements, and for some configurations, the state of the stability indicator, and the state of both output channels. This information is sent to the IO-Link master every 3.6 ms.

Example Based on the Value Above

Transducer Disable = 1 (Inactive)

Parameters Set Using IO-Link

These parameters can be read from and/or written to an IO-Link model of the Q5X Analog sensor. Also included is information about whether the variable in question is saved during Data Storage and whether the variable came from the IO-Link Smart Sensor Profile.

Unlike Process Data In, which is transmitted from the IO-Link device to the IO-Link master cyclically, these parameters are read or written acyclically as needed.

IO-Link Events

Events are acyclic transmissions from the IO-Link device to the IO-Link master. Events can be error messages and/or warning or maintenance data.

Code	Type	Description
25376 (0×6320)	Error	Parameter error (check datasheet and values)
36000 (0×8CA0)	Warning	All-time Run Time Event (Event indicating the corresponding configured running time has elapsed.)
36001 (0×8CA1)	Warning	Resettable Run Time Event (Event indicating the corresponding configured running time has elapsed.)
36003 (0×8CA3)	Notification	Teach Completed Event (Event indicating a teach has been completed.)
36004 (0×8CA4)	Notification	Factory Settings Restored Event (Event indicating that the factory settings have been restored.)
36005 (0×8CA5)	Notification	Teach Coerced Event (Event indicating a taught condition resulting in a setpoint being coerced. Taught was updated.)
36007 (0×8CA7)	Notification	Teach Failed Event (Event indicating an invalid target condition was attempted to be taught. Taught setpoint was not updated.)
36096 (0×8d00)	Error	Laser fault event (laser shut down for safety)
36097 (0×8D01)	Error	System Fault Event (Contact Banner Engineering to resolve.)
