## Item description

### Male connector/plug WINSTA® MIDI 4-pole

The WINSTA® MIDI male connector/plug with protection against mismatching are compact but high-quality PCB terminal blocks. They offer convenient operation and the greatest flexibility for installation. Our pluggable PCB connectors give you a versatile pluggable connection system for your devices that meets all the conditions for a stable device connection that is easy to put into operation. The mechanical coding and color coding of the pcb connectors ensure error-free installation of the individual components – including protection against mismatching. B coding enables the WINSTA® MIDI pcb connectors to be used for application control in automation, mechanical engineering and robotics. This pcb connectors can be used for electrical currents up to 25 A. Thus the product is especially suitable for high power loads. WINSTA® MIDI with Push-in CAGE CLAMP® spring pressure connection technology is used in can be found in a variety of projects you can use for quick, easy and maximally flexible electrical installation.

### WINSTA® MIDI solutions for your electrical installation – protected against mismatching and maintenance-free

The WINSTA® Pluggable Connection System is ideally tailored to the strict requirements of building installation. It makes electrical installation pluggable, and consequently more efficient, more reliable, and error-free. Using this pre-assembled system reduces time spent on assembly and installation errors at the construction site. Now you can also cut installation expenses without compromising safety and quality: with marking reduces the need for servicing and prevents unnecessary downtime.

- 
- protection against mismatching eliminates errors
- for automation controllers
- with B coding for controllers, for example lighting fixtures and sun blinds
- fast, secure installation
