SEA & LAND ELECTRONIC CORP.

ak ai ah af az

nSMD016

Features Surface Mount Devices

- Lead free device
 Size 3.2*1.6 mm/0.12*0.06 inch
- Surface Mount packaging
 - for automated assembly

Applications

Almost anywhere there is a low voltage power supply, up to 60V and a load to be protected, including: Computer mother board, Modem. USB hub PDAs & Charger, Analog & digital line card Digital cameras, Disk drivers, CD-ROMs,

,

Alpha-Top (Sea&Land Alliance)

Perfor	mance Specific	Marking	V _{max}	I _{max}	I _{hold}	I _{trip}	P _d	Maximum Resistance					Agency Approval

nSMD016 α b 48.0 100 0.16 0.37 0.6 1.00 0.30 1.200 5.000 Ihold = Hold Current. Maximum current device will not trip in 25°C still air. Itrip = Trip Current. Minimum current at which the device will always trip in 25°C still air. Vmax = Maximum operating voltage device can withstand without damage at rated current (Imax). Imax = Maximum fault current device can withstand without damage at rated voltage (Vmax). Pd = Power dissipation when device is in the tripped state in 25°C. Rtimin/max = Minimum/Maximum device resistance prior to tripping at 25°C. Rtimax = Maximum device resistance on hour post reflow.															
CAUT	ION : Operation b	beyond the s	pecified ratin	igs may res	ult in damage	e and possibl	e arcing an	d flame.							

Environmental Specifications

Test	Conditions	Resistance change
Passive aging	+85°C, 1000 hrs.	±5% typical
Humidity aging	+85°C, 85% R.H. , 168 hours	±5% typical
Thermal shock	+85°C to -40°C, 20 times	±33% typical
Resistance to solvent	MIL-STD-202, Method 215	No change
Vibration	MIL-STD-202, Method 201	No change
Ambient operating conditions :	- 40 °C to 85 °C	
Maximum surface temperature of the de	vice in the tripped state is 125 °C	

Agency Approvals :

Regulation/Standard:

2015/863/EU

EN14582

 α = Trademark N = Part identification

Recommended Pad Layout (mm)

Termination Pad Characteristics

Terminal pad materials : Terminal pad solderability :

Tin-plated Nickel-Copper Meets EIA specification RS186-9E and ANSI/J-STD-002 Category 3.

Rework

Use standard industry practices, the removal device must be replaced with a fresh one.

Thermal Derating Curve

Typical Time-To-Trip At 25°C

WARNING:

Use PPTC beyond the maximum ratings or improper use may result in device damage and possible electrical arcing and flame.

- PPTC are intended for protection against occasional over current or over temperature fault conditions and should not be used when repeated fault conditions or prolonged trip events are anticipated. Device performance can be impacted negatively if devices are handled in a manner inconsistent with recommended electronic, thermal, and mechanical procedures for electronic components.

Device performance can be impacted negatively in devices are nanuacia in a manner inconsistent with recommended electronic, inermai, and mechanical procedures for electronic components.
 Use PPTC with a large inductance in circuit will generate a circuit voltage (L di/dt) above the rated voltage of the PPTC.
 Avoid impact PPTC device its thermal expansion like placed under pressure or installed in limited space.
 Contamination of the PPTC material with certain silicon based oils or some aggressive solvents can adversely impact the performance of the devices. PPTC SMD can be cleaned by standard methods.
 Requests that customers comply with our recommended solder pad layouts and recommended reflow profile. Improper board layouts or reflow profile could negatively impact solderability performance of our devices.
