

## 40V 250mA Ultralow-Quiescent-Current LDO

### General Description

The GM7350 ultra-low quiescent current regulator features low dropout voltage and low current in the standby mode. With less than 1.5 $\mu$ A quiescent current at no load, the GM7350 is ideally suited for standby micro-control-unit systems, especially for always-on applications like E-meters, fire alarms, smoke detectors and other battery operated systems. The GM7350 retains all of the features that are common to low dropout regulators including a low dropout PMOS pass device, short circuit protection, and thermal shutdown.

The GM7350 has a 40-V maximum operating voltage limit, a -40°C to 125°C operating temperature range, and  $\pm$ 2% output voltage tolerance over the entire output current, input voltage, and temperature range. The GM7350 is available in a SOT893 through-hole and SOT235, surface mount packages.
