RJ Field **Ethernet Connection System for** Harsh Environment **The Industrial Ethernet Solution**

Description

The RJField connector allows you to use an Ethernet Class D / Cat. 5e connection for 10 BaseT.100 BaseTX or 1000 BaseT networks in harsh environments:

- Sealed against fluids and dusts (IP67)
- Shock. Vibration and Traction resistant
- · No cabling operation in field and no tools required
- Mechanical Coding / Polarization (4 positions)

With the patented RJStop® system you can use a standard RJ45 cordset in a metallic plug which will protect it from shocks, dust and fluids.

No hazardous in-field cabling and grounding !

RJF awarded "Best Automatic **Control Component**"

Transform your RJ45 cordset into a Harsh **Environment** Connector

This metallic plug is connected into a receptacle, using a fast 1/4 turn bayonet coupling mechanism (MIL-C-26482 type) providing both "audible and visual" coupling.

On the receptacle, one female RJ45 is soldered onto a PCB allowing for the following back terminations :

- another female RJ45
- a RJ45 cordset
- a solder termination

The RJ45 cordset shielding is transmitted to the RJ45 receptacle through DOC-000041-ROW-C April lateral grounding fingers. For an outstanding EMI protection, the conductive plating versions (Ni and Cd) with metallized receptacle inserts transmit the shielding to the connector shells and finally to the panel.
