STRUCTURE AND MATERIALS

The diagram illustrates the structure and materials of a composite beam. It consists of two parts: a circular cross-section on the left and a longitudinal view on the right. The cross-section shows a central core (1) surrounded by three trapezoidal layers (2) and an outer shell (3). The longitudinal view shows the beam's profile with the same layers labeled 1, 2, and 3.

SECTION A A

Technical drawing of a circular mechanical part. The drawing shows a top view and a side view. The top view is a circle with a diameter of $\phi 330$. It features a central hole with a diameter of $\phi 13.0 \pm 0.5$ and three radial slots. The width of each slot is 2.0 ± 0.5 . The outer diameter of the part is $\phi 21.0 \pm 0.8$. The side view shows the depth of the slots, which is 12.4^{+2}_{-0} . A maximum depth of 18.4 is also indicated.

A diagram of a rectangular prism. The height is indicated by a vertical double-headed arrow on the right side, labeled 9.3.
